#### Chapter 70

#### Glass and glassware

#### **Notes**

- 1. This Chapter does not cover:
  - (a) Goods of heading 32.07 (for example, vitrifiable enamels and glazes, glass frit, other glass in the form of powder, granules or flakes);
  - (b) Articles of Chapter 71 (for example, imitation jewellery);
  - (c) Optical fibre cables of heading 85.44, electrical insulators (heading 85.46) or fittings of insulating material of heading 85.47;
  - (d) Front windscreens (wind shields), rear windows and other windows, framed, for vehicles of Chapters 86 to 88;
  - (e) Front windscreens (wind shields), rear windows and other windows, whether or not framed, incorporating heating devices or other electrical of electronic devices, for vehicles of Chapters 86 to 88;
  - (f) Optical fibres, optically worked optical elements, hypodermic syringes, artificial eyes, thermometers, barometers or other articles of Chapter 90;
  - (g) Luminaires and lighting fittings, illuminated signs, illuminated name-plates or the like, having a permanently fixed light source, or parts thereof of heading 94.05;
  - (h) Toys, games, sports requisites, Christmas tree ornaments or other articles of Chapter 95 (excluding glass eyes without mechanisms for dolls or for other articles of Chapter 95); or
  - (ij) Buttons, fitted vacuum flasks, scent or similar sprays or other articles of Chapter 96.
- 2. For the purposes of headings 70.03, 70.04 and 70.05:
  - (a) glass is not regarded as "worked" by reason of any process it has undergone before annealing;
  - (b) cutting to shape does not affect the classification of glass in sheets;
- (c) the expression "absorbent, reflecting or non-reflecting layer" means a microscopically thin coating of metal or of a chemical compound (for example, metal oxide) which absorbs, for example, infra-red light or improves the reflecting qualities of the glass while still allowing it to retain a degree of transparency or translucency; or which prevents light from being reflected on the surface of the glass.
- 3. The products referred to in heading 70.06 remain classified in that heading whether or not they have the character of articles.
- 4. For the purposes of heading 70.19, the expression "glass wool" means:
  - (a) Mineral wools with a silica (SiO<sub>2</sub>) content not less than 60% by weight;
- (b) Mineral wools with a silica (SiO<sub>2</sub>) content less than 60% but with an alkaline oxide (K<sub>2</sub>O or Na<sub>2</sub>O) content exceeding 5% by weight or a boric oxide (B<sub>2</sub>O<sub>3</sub>) content exceeding 2% by weight.

Mineral wools which do not comply with the above specifications fall in heading 68.06.

5. Throughout the Nomenclature, the expression "glass" includes fused quartz and other fused silica.

#### **Subheading Note**

For the purposes of subheadings 7013.22, 7013.33, 7013.41 and 7013.91, the expression "lead crystal" means only glass having a minimum lead monoxide (PbO) content by weight of 24%.
